Subject: What is the problem NOW!!!

I need to know what was wrong at #2 Waste Water Treatment plant yesterday!!! Why were they pumping it out and hauling it off? What is the problem there NOW!!! Is it fixed???

Friday November 8, 2013 four 4 tanker type trucks at the #2 waste water treatment plant all day long. Couldn't find a human to ask if they were pumping out sewage, and where they were taking it. Trucks were out of Charlotte. Were they're taking it to Rock Hill or #3 waste water treatment plant to dispose of it?

Thank youf for your response.

Linda
